

VALLEY

IMMEDIATE CARE

Educational Opportunities

Providing pathways for future medical professionals to gain hands on experience in urgent care!

Find out what goes on behind the scenes of an operating Urgent Care clinic. Learn about work flow, various lab tests, x-ray equipment, & common illnesses and injuries treated in an UC clinic. Here you will learn about the differences in capabilities of an UC clinic vs. an emergency room.

At Valley Immediate Care, you will also have the opportunity to get some hands on experience by taking real x-rays of oranges & smartphones, and you'll even learn how to apply a fiberglass splint. You can try your hand at suturing and also get a tour of one of our clinics. All this and so much more!
